

Our Lady of the Sacred Heart Catholic College

Bath Street Campus | Traeger Campus | Sadadeen Campus

10th October 2016

To whom it my concern,

Our Lady of the Sacred Heart Catholic College, Alice Springs engaged Artificial Lawn Supplies to design, supply & project manage the resurfacing of 2 substantial areas of our College in Alice Springs.

Following a meeting in Perth WA, Murray Grime did not hesitate to fly to Alice Springs to inspect the sites & provide initial planning & quotes. During the process I was able to consider various options & suppliers and due to my perceived quality of the products and demonstrated expertise of Murray Grime we engaged Artificial Lawn Supplies.

The projects required substantial surface preparation, a total of 3 pre installation visits and consultation.

The installation team was highly experienced, finished all works to an exceptional standard, both within budgets and tight time frames. They showed both initiative and creativity.

We installed a junior student playground, incorporating a soft fall area, running track & a mix of colourful alphabet, number ladders, serpents, hopscotch & geometric shapes using a weave designed for hockey fields to give a soft surface minimising sand transfer to the classrooms.

We also installed a large area of Tennis Court weave in our middle school campus comprising of a Netball Court, Basketball Court and a number of handball courts.

Some Cricket Nets were also surfaced with artificial turf.

We intend to engage Artificial Lawn Supplies for further works and I would not hesitate to recommend them to anyone considering artificial lawn.

Yours faithfully,

Ian B Clarke

College Property Manager.
